Truly portable and versatile
- Battery or AC power option for music enjoyment anywhere
- Dock any iPod/iPhone, even in its case
- AUX-in for easy connection to almost any electronic device
- Discover, share music & more features via DockStudio app

PHILIPS
sense and simplicity

Highlights

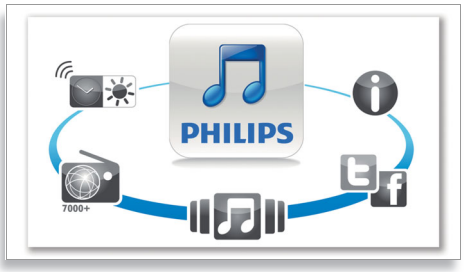
wOOx technology

wOOx technology is a revolutionary loudspeaker concept that allows you to hear and feel profoundly deep bass that is richer than any other audio system. Special speaker drivers work in harmony with the wOOx bass radiator, and precise tuning between the main driver and the tweeter ensures smooth transitions from low-mid to high frequencies. Dual suspension and a totally symmetrical sandwich construction deliver low and precise base without noticeable distortion. wOOx produces exceptionally deep and dynamic bass by using the speaker box full volume to truly magnify the impact of the music.

Dynamic Bass Boost (DBB)

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

DockStudio app on App Store



The free Philips DockStudio app brings lots of cool exclusive features to your docking speakers. You can listen to your favorite radio shows, discover new music with thousands of Internet radio stations worldwide, browse through your music collection and share what you're listening to with friends via Facebook and Twitter. In Clock mode, it lets you set multiple customized music alarms and gives updated weather reports. Download it from App Store and find out more.
